

INBRED TOMATO LINE 294
ABSTRACT OF THE DISCLOSURE

[0205] An inbred tomato line, designated 294, is disclosed. The invention relates to the seeds of inbred tomato line 294, to the plants of inbred tomato line 294 and to methods for producing a tomato plant, either inbred or hybrid, by crossing the inbred line 294 with itself or another tomato line. The invention further relates to methods for producing a tomato plant containing in its genetic material one or more transgenes and to the transgenic plants produced by that method and to methods for producing other inbred tomato lines derived from the inbred 294.
